

0786-CPD-20879: Honeywell Building Solutions: XLS80e, XLS80e-NI

This is a notification of the approval status of the products listed above.

These products have been designed, manufactured and tested in accordance with the requirements of the standards EN 54-2: 1997+A1, EN 54-4: 1998+A1+A2 and EN 54-13: 2005. Testing and approval of the products has been conducted by VdS Schadenverhütung GmbH at their laboratories based in Cologne.

Due to the large number of products in the market affected by these new standards and the CPD regulation the test labs have been overloaded with equipment requiring testing and this has caused some delays in issuing certification.

These products have completed testing to EN 54-2 and EN 54-4 and CPD approval has been granted. Following the completion of internal administrative procedures approval certificates will shortly be available.

VdS are still in the process of testing these products to the requirements of EN 54-13, the standard for system compatibility.

To meet the local market requirements, these products have been submitted to ANPI/BOSEC for their approval based on test reports from VdS, accompanied with some additional testing by ANPI laboratories. This process is now in progress.

Signed on behalf of Notifier by Honeywell:

Graham Simons

Regulatory Manager
